

MODULAR CHARGE DESKS

Fleetwood charge desks are fully modular allowing you to combine any of the modules shown here. Create a unique charge desk to meet your specific needs. Start small this year and add modules as your budget allows. Change out a module later, or reconfigure those you have, when your needs change.

Here are the main charge desk choices you will make:

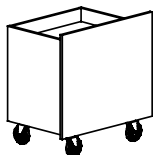

- Upper ledge height: 32" high or 39" high (32" typically for elementary level)
- Standard Ledge (3" deep") or a Patron Ledge (8" deep). The upper ledge height is higher than the work surface. You will need to choose one for some modules.
- Straight versus rounded corner units

All of the modules shown here come in either the 32" or 39" high versions. Those modules offering either the Standard or Patron Ledge have two numbers. The first number for the Standard Ledge; the second number for the Patron Ledge. Desk work surfaces are all 29" high.

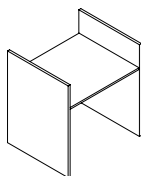

Modules

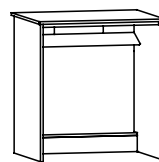

Finishing End Panel
80.013
(must order two per system)

Depressible Book Truck
80.0233
(works with book return and
foyer book return units)
