- 9.** Align the right hand end panel to the top and bottom boxes with the back panel in the end panel groove.

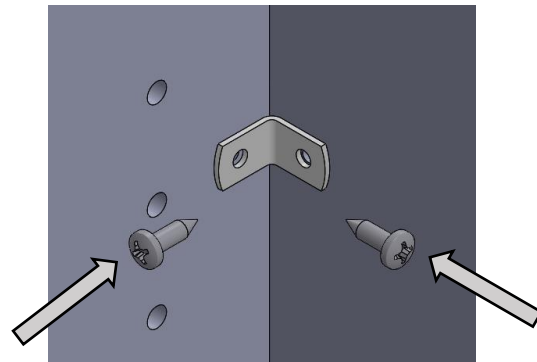

- 10.** Attach the right hand end panel to the top and bottom boxes using (4) hex head bolts and (4) washers. Hand tighten.

- 11.** Place the top panel on the top box with the hole side facing down. Ensure the brackets are lined up with the holes. Attach the top panel to the brackets using (6) #10 X 0.625" screws. Tighten to a torque of 30-35 in-lbs. Then tighten all end panel hex head bolts to a torque of 50-60 in-lbs.

- 12.** *If shelf is 60", 72", or 84" high, complete this step. Attach (2) 90-degree brackets with (4) #10 X 0.625" screws to the inside support locations. Tighten to a torque of 30-35 in-lbs.*
