

Book Box Instruction Sheet

737400-INST
Rev. A

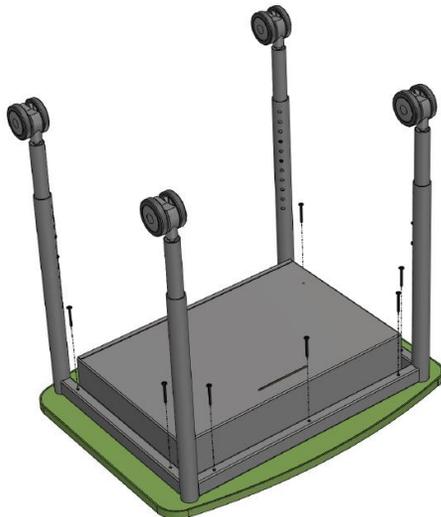

- 1.** Place the top on a non-scratching surface with holes facing up. Place the book box onto the top and align the mounting holes with the pilot holes in the top.

- 2.** Place the frame on top of the flanges of the book box. Align the holes in the frame and the book box to the holes in the top.

- 3.** Insert #10 X 2" screws through the frame and the book box into the pilot holes in the top. Tighten to a torque of 30-35 in-lbs. The book box is now captured between the top and the frame.

- 4.** Carefully flip the product over to the in-use position.
